1 Hello - I want to register with DOE my unequivocal opposition to storage of radioactive waste, from power plants, weapons decommissioning, or any other foreign or domestic sources, at Yucca Mountain, Nevada. I do not feel this site is geologically suitable for storage of this material, and I do not believe that single-site storage of such enormous and growing quantities of radioactive waste is appropriate anywhere.

2 Although I realize DOE has not yet focused EIS review on transportation issues related to "disposal" of this nuclear waste, I also want to register my intense opposition to transporting radioactive waste across the U.S. Unfortunately, I cannot suggest a viable alternative to current plans, but I feel strongly that power companies should maintain responsibility for their waste on-site, until a truly suitable solution is found. Transporting thousands of shipments of unbelievably dangerous radioactive material by truck and rail through populated areas - such as my own St. Louis metro area, a highly likely route - and massing this material in one single site opens country to potentials for cataclysmic accidents or acts of terrorism.

3 Let the stuff stay where it is, and let the federal government resist the pressure of for-profit utility companies wanting the government and taxpayers to assume responsibility for their insoluble problem.

010255

As a citizen and taxpayer, I say NO NO NO to the Yucca Mountain storage site plan, and all transportation and related plans relating to it.

Thank you for registering and considering my comment.

Jean C. Ponzi
